TRUE CO-OPERATION

Five thousand mill operatives, working under a co-operative system which prevails in certain sections of Virginia, have voted a decrease in their wages of 15 per cent and the cutting off of a 10 per cent weekly bonus. The workers realize that a general deflation is going on, and that they must share with their employers the result of the depression. It is a movement that is manifesting itself in other industrial centers. Wage earners know that unless all are reduced many will be separated from their positions altogether.

Banish Pain

THERE is no use talking—no one can work or play when they are not feeling well and strong. Life, without health and strength, is a mere painful, pleasureless existence.

One of the most important conditions of good health is to keep the kidneys normal and active. When weak or deranged, they do no filter out of the blood the impurities that should be eliminated from the system. When these impurities remain, the blood stream is poisoned and pain and suffering result.

Foley Kidney Pills

aid and relief. They strengthen and invigorate weak or diseased kidneys and help them keep the blood stream pure and clean, banishing backache, rheumatic pains, stiff or swollen joints, sore muscles, and other symptoms of kidney trouble.

W. R. Fox, 125 W. Washington St., Noblesville, Ind., writes: "After suffering many months with kidney trouble, and after trying a number of remedies for the same, I purchased a bottle of Foley Kidney Pills and took them. They not only did me more good than any other kidney remedies I ever have used, but they positively cured my kidney right. Other members of my family have used them with similar results."

Lesson in OPTOMETRY

Explain further why a patient must get used to glasses in some cases before comfort is secured.

Where the muscles of the eyes have for years labored against an error of vision, they have in a sense become used to the work of trying to overcome the error. When glasses are worn this duty is taken from the eyes and the muscles have to adjust themselves to the new conditions. This adjusting process causes the patient more or less distress as a rule, but by exercising the necessary patience perfect comfort is secured.

An error of vision that is important enough to be corrected, should be KEPT corrected, should it not?

Yes, an error of vision is corrected only when the glasses are worn. The minute the glasses are removed from the eyes the error ceases to be corrected and for that reason the patient should diligently strive to become accustomed to his glasses, in order that he may derive the necessary benefit from them.
